Mandatory Language for Monitoring and Reporting Violation Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR) MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

The **RRA-Lake Arrowhead Lake Lots** water system PWS ID **0390021** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period the Second Quarter 04/01/2021—06/30/2021

We are taking the following actions to address this issue:

The Lake Arrowhead WS was not required to submit this report while the filter plant was in operation. When the Authority changed over to a purchased water system this report was over looked. All reports since this time period has been submitted to the TCEQ including the second quarter 2021 DLQOR.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact **Fabian Heaney, Assistant General Manager Red River Authority of Texas** at 940/723-8697.
